The Euro Med Telco Forum (EMTF) is a collaborative group formed by the associations of telecommunication or ICT engineers of Greece, Italy and Spain within the framework of FITCE (Federation of National Associations of ICT & Media Professionals). Currently EMTF has focused its main objective to promote a strengthen collaboration in joint innovation projects and/or R&D, for which they have been proposed up and finding partners in specific projects with professionals, universities and companies with the respective associations have agreements.

In this two days event we have chosen maritime traffic and smart ports as the main topic to promote the collaboration and partnerships to develop R&D projects that could fix in the European calls of the framework of Horizon 2020. We want to join representative bodies of the three countries, port authorities, research organizations, universities, companies and ICT professionals to share their projects and initiatives in order to reach partnerships and promote ICT projects in the Mediterranean basin.

Port of Valencia is one of the most important ports of the Mediterranean basin and it's the perfect place to meet to talk about maritime traffic.

Agenda

Friday, 22 April – Valencia Port

9:30h Guided tour of the Port of Valencia

11:30h Opening

12h Conference Innovation in Smart Ports

The solutions will be presented at this panel innovation, will show recent advances in the application of ICT in port and shipping environments, under a new concept of Smart Ports.

14h Lunch break

15h Panel 1: Innovative ICT solutions in Logistics and transport, including infrastructures

In a logistics sector with highly increased collaboration, intermodal and dynamic re-routing of freight, there is a need to exploit ICT advances such as Internet-of-Things, big data, new satellite navigation infrastructure and Intelligent Transport Systems with changes in business needs.

16h Panel 2: Innovative ICT solutions for the Port of the Future

Ports are essential for the European economy as a global player and for the internal market. Specific issues (like dredging, emission reductions, and energy transition, incl. electrification, smart grids, and the use of renewables management and emissions) are combined with other challenges common to all multi-modal terminals.

17h Coffee Break

17:30h Panel 3: Data analytics and data fusion for maritime security

The management of risks in the international supply chain ensuring the security (and safety) of EU residents, the protection of the financial and economic interests of the EU, facilitating legitimate trade. The "EU Strategy and Action Plan for customs risk management" drafts a strategy and an action plan for improving customs risk management and supply chain security.

20h Event dinner at Hotel Santos Las Arenas

Eugenia Viñes 22-24, Valencia

Saturday, 23 april – Hotel Santos Las Arenas

10h Networking and matching

- A space in which the different companies, universities and professionals could talk and establish partnerships
